ABOUT ME

I am a self-taught full stack web developer with experience in developing user-friendly and responsive web applications. Committed to continuous learning and staying up-to-date with the latest industry trends. I seek a challenging role in a dynamic organization, utilizing my front-end, back-end, and full stack expertise to drive success.

PROJECTS

GigZone - Freelancing Portal (Multi-vendor)

GigZone is an advanced multi-vendor freelancing platform designed to connect freelancers with job opportunities effortlessly. With a user-friendly interface and cutting-edge features, GigZone offers an unparalleled experience for both freelancers and employers.

Git Repository :- https://github.com/sidhiqali/GigZone

Key Features:
1. Real-time Chat: Enables instant communication for efficient collaboration between freelancers and employers.
2. Order Management: Streamlines project tracking and completion with an intuitive interface.
3. Secure Payments: Integrates Stripe for secure and reliable transactions, ensuring trust and safety.
4. Interactive Comment Section: Facilitates user engagement with star ratings and feedback options.
5. Performance Optimization: Implements lazy loading and code splitting for enhanced user experience and faster load times.
6. Responsive Design: Utilizes Tailwind CSS for responsive design
7. UI/UX Design: Crafted in Figma for a visually appealing and user-friendly interface.

Technologies Used:
- - Front-end: React-Query, Axios, Cloudinary, Moment, React Slick, Tailwind CSS, React Toastify, Lazy-Load-Image-Component.
